

FOR IMMEDIATE RELEASE

06.22.2009

SV Clean Tech is a network of emerging students, entrepreneurs, and professionals driven and passionate about promoting clean technology, renewable energy and sustainability. Our diverse disciplines include Business, Green building development, Entrepreneurship, Engineering, Design, Environmental Studies, Computer Science, and beyond.

Our goal is to work toward a more sustainable living. We help facilitate this by helping clean tech-driven student groups promote their cleantech innovations to the community.

So far in our endeavor, we've provided photo and micro-press release media coverage for various cleantech events in the SF Bay Area including; ConnectivityWeek09, Tiecon09, 2009 Green Business Camp, Green Festivals 2008, OpenForum2009, and Google's PowerMeter. Additionally we have partnered with several key events and organizations including iDrive Green/ Indy Goes Green(Indy 500), MIT Green Events, Stanford Global Climate and Energy Project (GCEP), Eco Festivals, Green Business Camp, Bay Area Sustainable Buildings Expo and many more.

We are actively looking to create co-branding community partnerships to achieve our goal of expanding our network of those working toward a more sustainable future.
